

# BIGS EASY LIFT

## SPECS

### Magnet 2,100 pound (MAG03)

Footprint: 6.5" x 7.75"

Height (magnet only): 3.5"

On/Off Handle

(part that attaches to lift): 8"

Attachment: 7.5"

Weight: 31 lbs.

#### Magnet Strength Explanation:

The magnet Max Lift Rating is for perfect conditions, meaning 100% of magnet footprint is touching 100% metal on the cover or grate. Most covers have a variety of raised designs and/or raised logos, which causes the magnet to have less surface engagement. This means the magnet cannot touch 100% of the metal, which reduces the strength of the magnet.

It's critical to NEVER use a magnet overhead and to NEVER put hands, feet, or any part of your body underneath any product that the magnet is lifting. It is a policy of BigsEasyLift to ensure that safety is our #1 priority!
